

# TEST PROFESSIONAL

AMANDINE ROUVROY

## Competencies

|                |  |
|----------------|--|
| <b>Domains</b> | TEST ANALYSIS<br>TEST COORDINATION   |
| <b>Tools</b>   | Test : HP Quality Center, TFS, Wcf Test Client, Test Manager<br>Change Management : ClearCase, Serena ChangeMan<br>Mainframe : QMF, FileManager, CA7, Cortex |
| <b>Systems</b> | MS Windows, Linux, Mainframe Z/os  |

## Education

|   |  |             |
|---|--|-------------|
| <b>Ecole Polytechnique Universitaire de Lille</b> | Master degree - Civil Engineer in Computer-science, Micro-electronics and Automation, Specialization in computer science | <b>2006</b> |
| <b>Languages</b>                                  | French : Mother tongue<br>English : Fluent<br>German : Basics<br>Dutch : Basics  |             |

**ELIA**

1 year

Test Analyst

**Tasks**

- Test strategies management & planning
- Test requirements, test cases design & test campaigns preparation
- Test cases execution & incidents management
- Test progression follow-up, reporting
- Acceptance & production support
- Test processes improvement, Test progress reporting automation

**Types of projects**

- Applications rewrite
- Evolutive maintenances
- New Services

**Note**

*The test activity is not mature in Elia yet. Apart from the projects themselves, a very interesting background task was to improve the test processes and provide to testers tests methods and tools to work more efficiently:*

- *Test strategy & test suite template defined*
- *Test tools developed to prepare test campaigns and execute test cases (VBA)*
- *Test metrics defined*
- *Test progress reporting automated*

|                               |                        |   |
|-------------------------------|------------------------|---|
| <b>Technical environment</b>  | <b>Technologies</b>    | .Net  |
|                               | <b>Databases</b>       | Sql   |
|                               | <b>Systems</b>         | MS Windows  |
|                               | <b>Tools</b>           | Team Foundation Server, Wcf Test Client, MSM Queue Explorer, MS Sql Server, Xml Spy, Sparx Enterprise Architect |
| <b>Functional environment</b> | <b>Business Domain</b> | Energy [nominations, subscriptions, metering]   |

**EUROCLEAR SA/NV**

2 years 1 month

Test Analyst

**Tasks**

- Test environments preparation ;
- Test requirements & scenario definition ;
- UI Tests preparation ;
- Tests scenario execution ;
- Incidents management ;
- Tests reporting ;
- Acceptance tests coordination ;
- Launch preparation & coordination

**Types of projects**

- New services on new communication platforms
- Critical applications UI migration from vb6 to vb.Net

**Note**

*Together with my business analyst experience, working at Euroclear enabled me to participate to projects with very various technical environments and constraints – PL1, vb .Net, Java; using different communication interfaces and channels like BT or Swift. I was involved on functional and technical projects impacting most of the applications of the bank.*

*The human experience took also an important place in my work, working with internal and outsourced teams, and building strong links with all the actors – IT and business, of all the projects on which I had the pleasure to work.*

*I had the chance to work with teams seeing methodologies as a way to improve our way of working and not as a constraint. I was trained one month inside operational teams, followed with interest the work around business processes and business requirements templates set-up, and was part of the Lean wave. I keep from these experiences an instinctive ability to organization with flexibility and efficiency in mind.*
